## THE TRIBUNE.

NEW-YORK, WEDNESDAY MORNING, JULY 7.

**WEST POINT ACADEMY.**—The last National Intelligencer contains the Report of the Board of Visitors for 1841 to the Military Academy at West Point—Com. Charles Stewart President, and C. B. Haddock, Esq. Secretary—dated West Point, June 21st. It fills nearly four columns of the Intelligencer; we must present its substance in a much smaller compass.

The Board devoted seven hours of each day from the 7th to the 21st ult. to a vigorous examination of the course of instruction pursued in the Academy, and they report that it is remarkably comprehensive, correct and efficient, in every department of Geometry, Natural and Experimental Philosophy, Chemistry, Mineralogy, Geology, Mechanics, Optics, Astronomy, Magnetism, &c. as well as Engineering, Military and Civil Gunnery, Architecture, formation of Armies, Strategy, &c. The Board report that the course of Instruction is not only well planned and thorough, but that the Professors to whom it is confided are admirably qualified for the discharge of their respective duties, and that no improvement therein is practicable.

In some other respects, however, the Board suggest improvements. The provision for moral and religious instruction is inadequate. The Chaplain is also Professor of Geography, English Grammar, Rhetoric, Moral Philosophy and Constitutional Law. His time is engrossed by these branches, so that he has very little leisure for his pastoral duties, aside from Sunday services, and the Board very properly recommend that he be relieved of his Literary and allowed to attend strictly to his Clerical duties.

They also recommend that the study of Logic be added to those now prescribed, and that greater attention be paid to proficiency in the art of Composition. [It would be a shame to train up a generation of heroes to win victories who would not know how, after winning them, to write decent bulletins.] In Eloquence, too, the Board find a lamentable want of culture and recommend improvement. The principal text-book used in the study of French is of a very objectionable character, and must be reformed.

The Hospital is very good, but the Barracks for the accommodation of the Cadets are insufficient and very defective. They contain ninety-six rooms, barely sufficient for the accommodation of one person each, yet two hundred and fifty young men are crowded into them, to the detriment of their health, progress and morals. They are badly located and clumsily constructed. The Board recommend new ones, more spacious, commodious and slightly, on the bank of the river.

The feed and furniture are unexceptionable. The Military Instruction is excellent.

The naked cost of Instruction and maintenance the past year was \$127,754.30. Each Cadet is allowed by the Government \$28 a month, amounting last year to \$81,405.20 in all. For this sum which must provide his own board, clothing, books, furniture, &c. No one is allowed to receive any aid from his family or friends, so that a perfect equality of means between the rich and the poor must exist so long as they are at West Point. [On the justice and expediency of this absolute support of a body of students, without requiring any obligation to render service in return, we have something to say at another time.]

A great many of the Cadets leave before completing their studies, impelled either by physical inability, dislike to the routine, or indisposition to submit to the rugged and arduous life there prescribed. They are generally the sons of the rich, or those who have been brought up in indulgence and luxury.

In conclusion, the Board express a unanimous and ardent conviction of "the great permanent interest of our whole country in this our only National Institute of Science, earnestly hoping that no narrow public councils or local jealousies will ever be suffered to divert it from its original purpose, or to impede its natural progress to the utmost limit of academic perfection."

**BRIGHTENING PROSPECTS OF THE CROPS.**—The good intelligence comes in from every quarter that the recent change in the weather has been most beneficial to all the crops of the season. The fears, therefore, entertained widely a few days since, that the harvest would be meagre, are well nigh dissipated. The following are the latest items that have come to hand.

Information from various quarters, combined with our own observations, satisfies us that the croakings about "short crops" will not be realized. The drought for a while rendered the prospect doubtful. But the effect produced by the rains of the last ten days, is sufficient to dispel apprehension. On the whole, we are now prepared to state, as an opinion formed from thorough inquiry and minute observation, that the Crops generally in Western New York will turn out at least equal to an average harvest. [Roch. Eve Post, July 1.

During the last week there fell a great quantity of rain. It is refreshing to the crops of oats and corn, which look very well; but rather injurious to the grass that was cut. [Perry (Pa.) Freeman, July 1.

The crops in the vicinity of Hannibal, Mo. on the Missouri river, consisting of wheat, corn and hemp, are represented as appearing beautifully and promising an abundant yield. The Journal says—"A little rain, which we are tolerably sure of having, will enable the farmers to plant out their tobacco, and then we may anticipate as fine a crop as the earth ever produced.

The Grand Gulf Miss. Advertiser, of the 27th, mentions that not a drop of rain had fallen in the town for more than six weeks, and that the cotton and corn crops were suffering greatly in consequence.

The numerous showers of rain with which our vicinity has been favored during the past few days have given an entire new aspect to the prospects of the farmers in this section. The long period of dry weather has very much injured the hay crop which must necessarily be very light, but the prospective corn, potato and oat crops look finely. [Bennington (Vt.) Banner.

The country since the late rains, wears a delightful appearance, and our farmers are in fine spirits at the prospects which await them. [Troy Whig.

**T E E T H .**  
ON THE ATMOSPHERIC PRESSURE PRINCIPLE:  
ON A SINGLE PLATE—NOT A DOUBLE ONE.

THE decided advantage of the single plate is that it is exact, and affecting the breath, adheres much better to the gum than a double plate, and causes no pain or irritation to the gums in chewing. The undersigned, having lost all his teeth but five, can exhibit his unparalleled success in setting artificial teeth on a gold plate, held firmly to the gum by the sole pressure of the atmosphere, in his own mouth, where the whole set, upper and under, can be seen by any one who will favor him with a call.

**SAMUEL B. SMITH, Dentist,**  
No. 30 Chambers-st, 11 doors west from the Park.  
REFERENCES.

From the Free Circulating Advertiser.—"Dr. Samuel B. Smith, whose success in setting teeth on a gold plate, on the atmospheric pressure principle, is now becoming so celebrated, has this day gratified us with a sight of his truly astonishing success. The set he has supplied in his own mouth cannot possibly be surpassed, and far exceed any thing of the kind we have ever seen."

From the New-York Sun.—"We have the attention of all our readers, if they wish to see the utmost perfection of the dent art, call at the office of Dr. Samuel B. Smith, 30 Chambers-street. This gentleman's own upper and under set of teeth, held atmospherically to the gums on a gold plate, surpasses any thing of the kind we have ever seen. We have also seen another set made by the same gentleman for a lady, who assures us that she mistakes with them, and uses them just the same as natural teeth. No one can possibly so easily distinguish them from the natural ones growing from the gums."

From the New-York Mirror.—"It will puzzle the most critical to discern the artificial teeth inserted by Dr. Samuel B. Smith from the natural ones. His work is beautiful and accurate."

Further References.—S. P. B. Morse, Professor &c. in the University of New-York; Dr. Samuel E. Smith, 30 Chambers-street, 11 Waverly Place; Lewis Hallock, M. D. 125 Madison-st; D. Fasson, T. T. or Bible House; Wm. Bradford, 16 Spruce-st.

**RICHARDSON'S ACADEMY OF BOOK-KEEPING AND PENMANSHIP.**—Rooms 245 Broadway, near Astor House. BOOK-KEEPING BY DOUBLE AND SINGLE ENTRY, AND EASY PENMANSHIP. PENMANSHIP. Terms only \$5.

Mr. Richardson is pleased to inform the Merchants of New-York, that the above Academy is open, and is in full and successful operation, in rooms 245 Broadway, three doors above the Astor House. A few more pupils will be received.

Reference is made to this establishment young gentlemen will be able, and with all reasonable expedition prepared in a satisfactory and thorough manner to fulfill the duties of the counting house in their various positions.

**RAPID MERCANTILE PENMANSHIP.**  
The style of Penmanship adopted in this establishment is made use of in many of the counting houses in Boston, and has been taught for the last five years in the public schools. The course pursued in preparing pupils for the counting house can be ascertained by applying between the hours of 9 and 1, and between 3 and 6 P. M. Every attention will be paid to facilitate the progress of pupils in their studies, by personal instruction, and each class will consist of but six pupils.

The Academy is provided with every convenience for a first rate establishment. The terms are reduced in accordance with the last state of the times, so that persons wishing to acquire a good and satisfactory knowledge of the above branches are respectfully invited to call and examine the school.
